

2. Adjustment made to schema:

- Added categories schema

```
src > sanity > schemaTypes > TS categories.ts > ...  
1 |  
2 import { defineType } from "sanity";  
3  
4 export const categorySchema = defineType({  
5   name: 'categories',  
6   title: 'Categories',  
7   type: 'document',  
8   fields: [  
9     {  
10      name: 'title',  
11      title: 'Category Title',  
12      type: 'string',  
13    },  
14    {  
15      name: 'image',  
16      title: 'Category Image',  
17      type: 'image',  
18    },  
19    {  
20      title: 'Number of Products',  
21      name: 'products',  
22      type: 'number',  
23    }  
24  ],  
25 }
```
