

Day 4 Building Dynamic Frontend Component for Marketplace

[Laiba Jaweed](#)

Key Components :

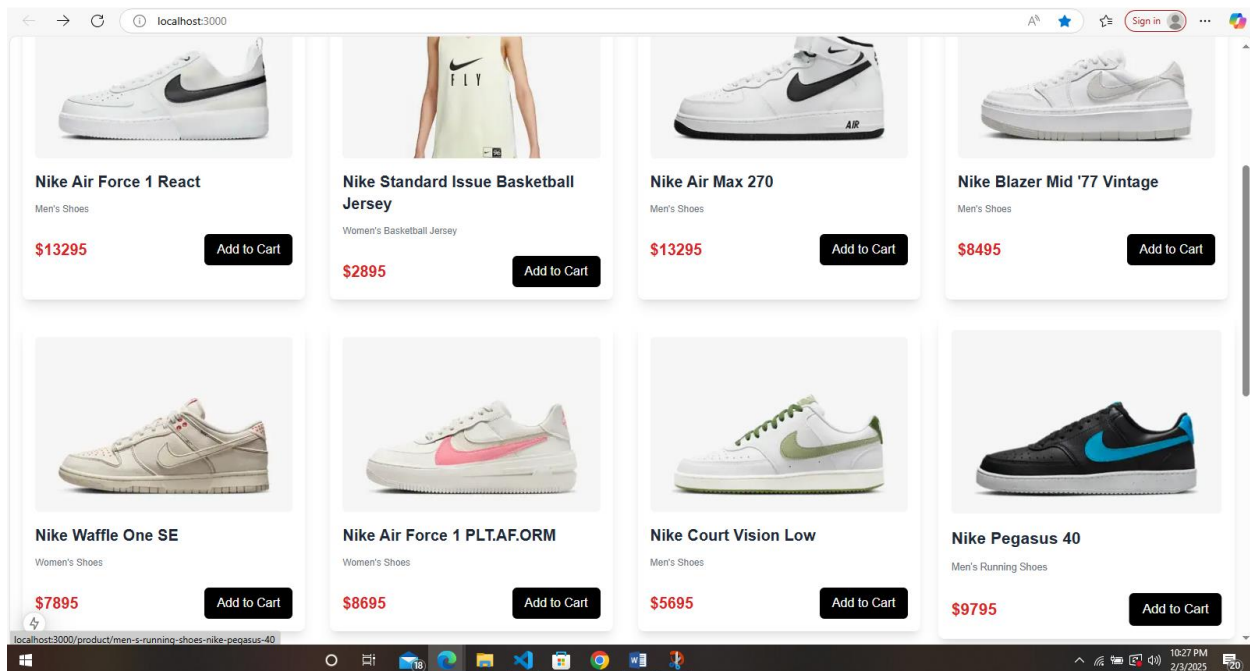

Product Listing Component

Code Snippet:

![{]({product.image.asset.url)

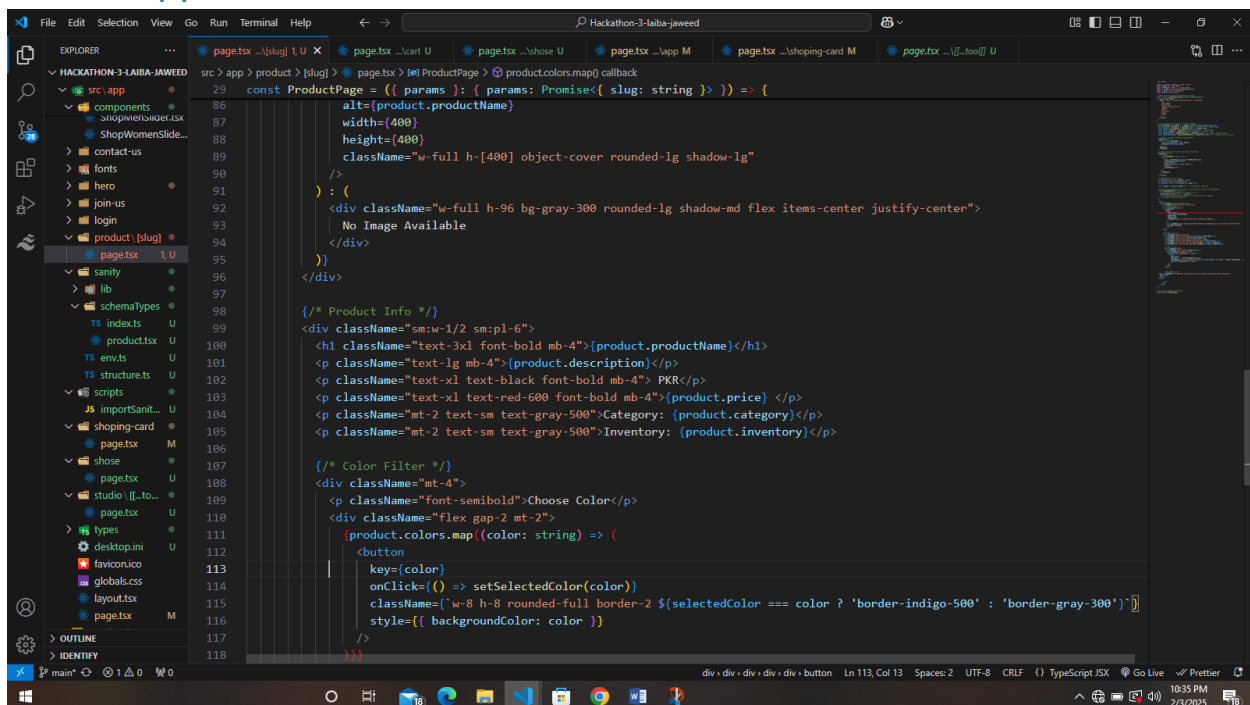

Output Snippet

Product Display

Dynamic Routing Component

Code Snippet:

Dynamic Routing in Next.js:

Dynamic routing allows you to create routes based on URL parameters.

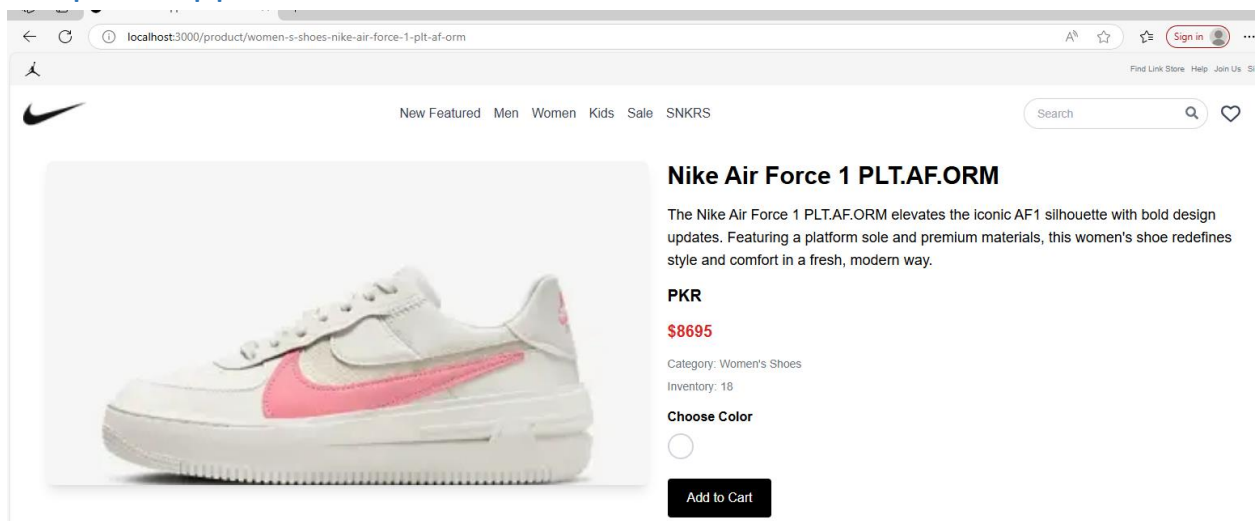

- File-based routing: Create dynamic routes using `[param].js` in the `pages` folder (e.g., `pages/[id].js`).
- `getStaticPaths`: Defines which dynamic routes need to be pre-rendered at build time.
- `getStaticProps`: Fetches data for each dynamic route.

Example:

- `pages/[id].js` matches routes like `/product/1`, `/product/2`.

This enables flexible, dynamic content rendering based on URL parameters.

Output Snippet:

Laiba Jaweed

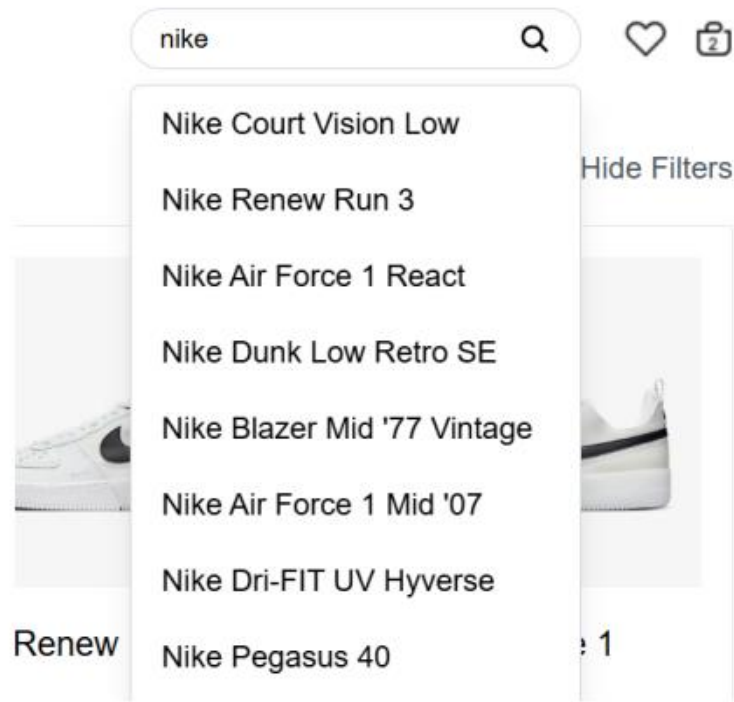

Search Bar

Code Snippet:

```
src > components > Header.tsx > Header
9 export default function Header() {
10   const [isMenuOpen, setIsMenuOpen] = useState(false);
11   const [searchQuery, setSearchQuery] = useState('');
12   const [products, setProducts] = useState<any[]>([]);
13   const [filteredProducts, setFilteredProducts] = useState<any[]>([]);
14
15   // Fetch products from Sanity
16   useEffect(() => {
17     const fetchProducts = async () => {
18       const data = await client.fetch(`*[_type == "product"]{
19         _id,
20         productName,
21         category,
22         price,
23         image,
24         description,
25       }`);
26       setProducts(data);
27       setFilteredProducts(data); // Initialize with all products
28     };
29     fetchProducts();
30   }, []);
31
32   // Handle search query change
33   const handleSearch = (event: React.ChangeEvent<HTMLInputElement>) => {
34     const query = event.target.value.toLowerCase();
35     setSearchQuery(query);
36
37     // Filter products based on search query
38     const filtered = products.filter((product) =>
39       product.productName.toLowerCase().includes(query)
40     );
41     setFilteredProducts(filtered);
42   };
43 }
```

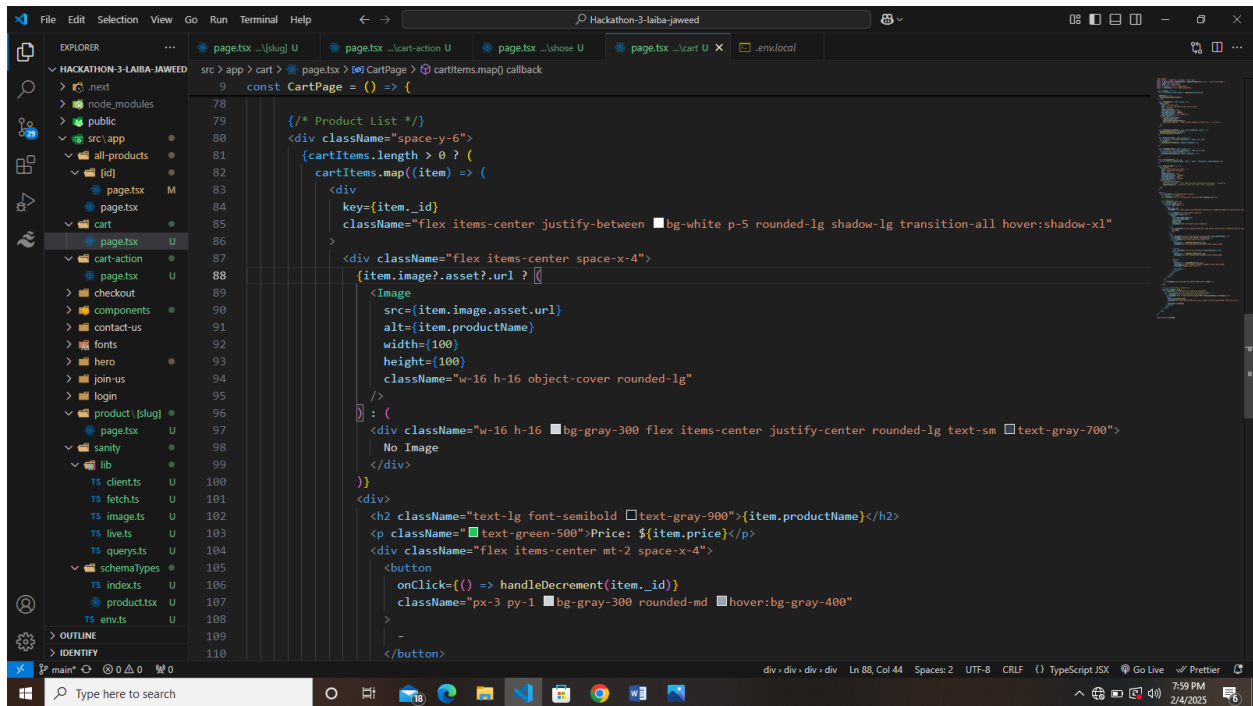

```
src > components > Header.tsx > Header
9 export default function Header() {
10   // Right side - Search and navigation
11   <div className="hidden md:flex space-x-4 items-center">
12     /* Search Bar */
13     <div className="relative">
14       <div className="flex items-center gap-[10px] px-[15px] py-[5px] border
15         border-gray-300 rounded-2xl">
16         <input
17           type="text"
18           placeholder="Search..."
19           value={searchQuery}
20           onChange={handleSearch}
21           className="bg-transparent outline-none text-black text-[14px]
22             placeholder:text-gray-500 w-full"
23         />
24         <div className="text-black w-[20px] h-[20px]" />
25       </div>
26
27       /* Dropdown for filtered products */
28       {searchQuery && filteredProducts.length > 0 && (
29         <div className="absolute bg-white w-full border border-gray-300
30           rounded-md shadow-lg mt-2 z-10">
31           <ul>
32             {filteredProducts.map((product: any) => (
33               <li
34                 key={product._id}
35                 className="px-4 py-2 text-black hover:bg-gray-200 cursor-pointer"
36               >
37                 <Link href={`/Products/${product._id}`}>
38                   {product.productName}
39                 </Link>
40               </li>
41             ))}
42           </ul>
43         </div>
44       )}
45     </div>
46   </div>
47 }
```

Output Snippet:

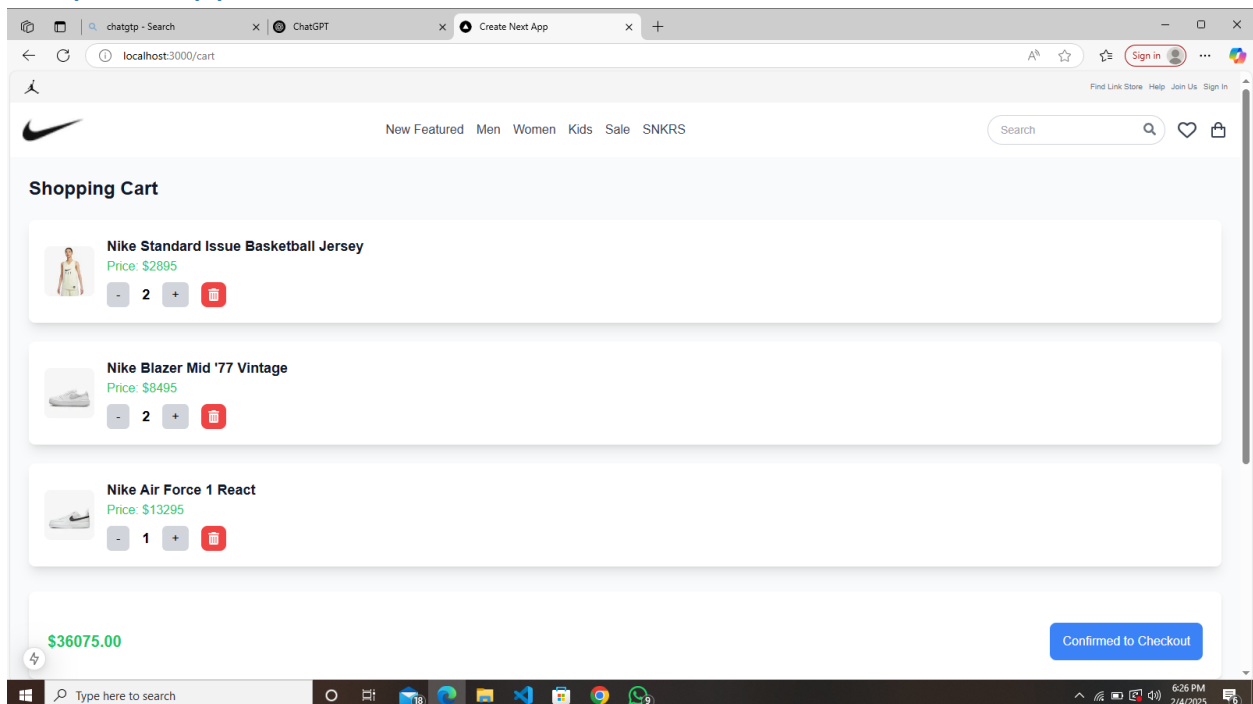

Cart Component

Code Snippet:

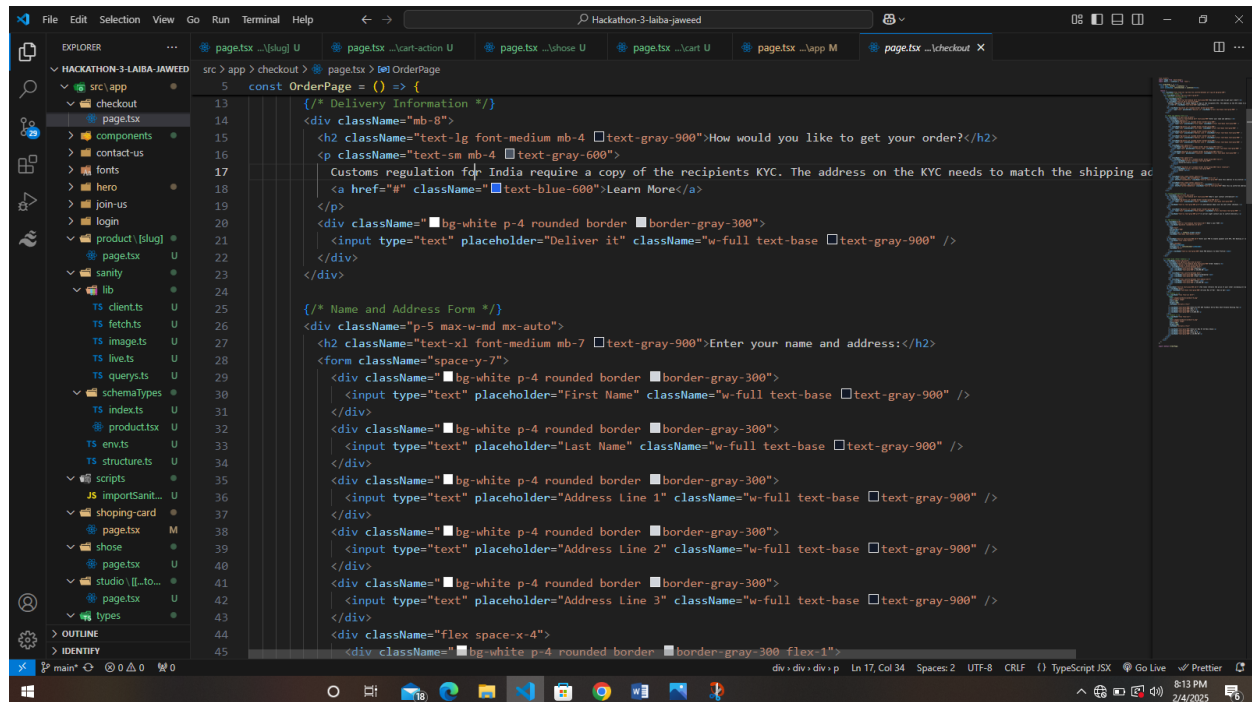

```
9  const CartPage = () => {
78
79    /** Product List */
80    <div className="space-y-6">
81    {cartItems.length > 0 ? (
82      cartItems.map((item) => (
83        <div
84          key={item._id}
85          className="flex items-center justify-between bg-white p-5 rounded-lg shadow-lg transition-all hover:shadow-xl"
86        >
87        <div className="flex items-center space-x-4">
88          {item.image?.asset?.url ? (
89            <Image
90              src={item.image.asset.url}
91              alt={item.productName}
92              width={100}
93              height={100}
94              className="w-16 h-16 object-cover rounded-lg"
95            </Image>
96          ) : (
97            <div className="w-16 h-16 bg-gray-300 flex items-center justify-center rounded-lg text-sm text-gray-700">
98              No Image
99            </div>
100          )
101        </div>
102        <h2 className="text-lg font-semibold text-gray-900">{item.productName}</h2>
103        <p className="text-green-500">Price: ${item.price}</p>
104        <div className="flex items-center mt-2 space-x-4">
105          <button
106            onClick={() => handleDecrement(item._id)}
107            className="px-3 py-1 bg-gray-300 rounded-md hover:bg-gray-400"
108          </button>
109        </div>
110      )
111    </div>
112  )
113}
```

Output Snippet:

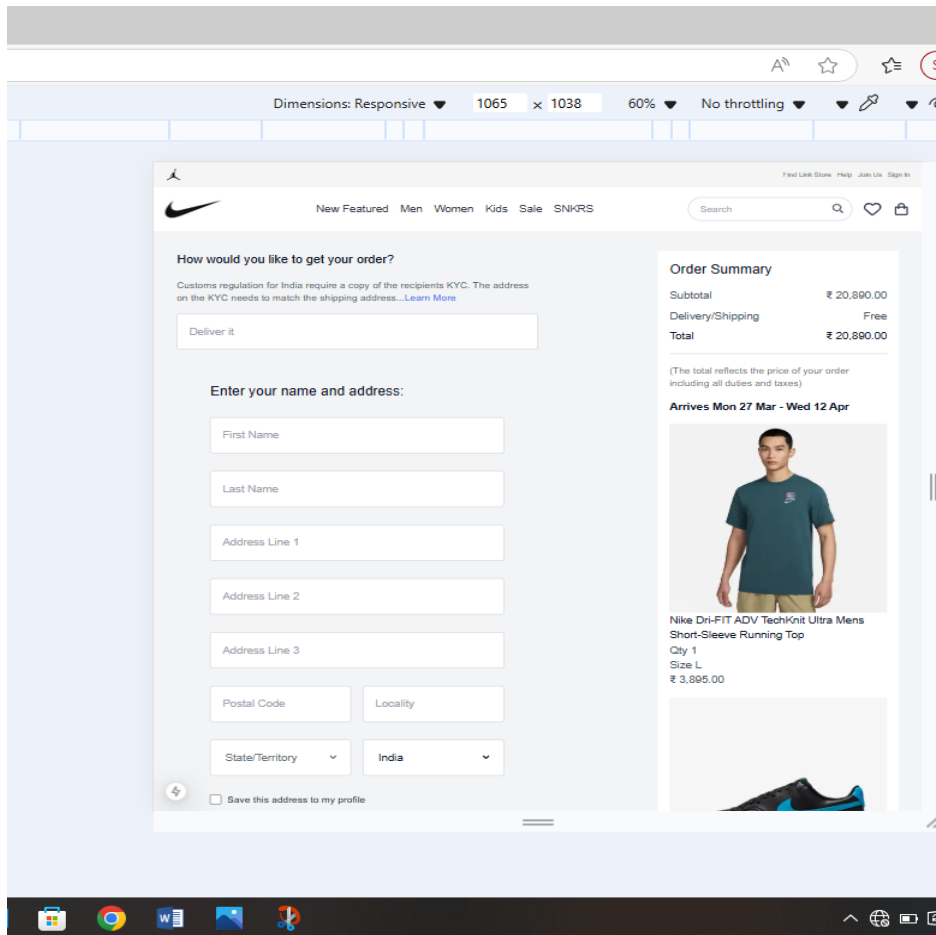

Checkout Component

Code Snippet:

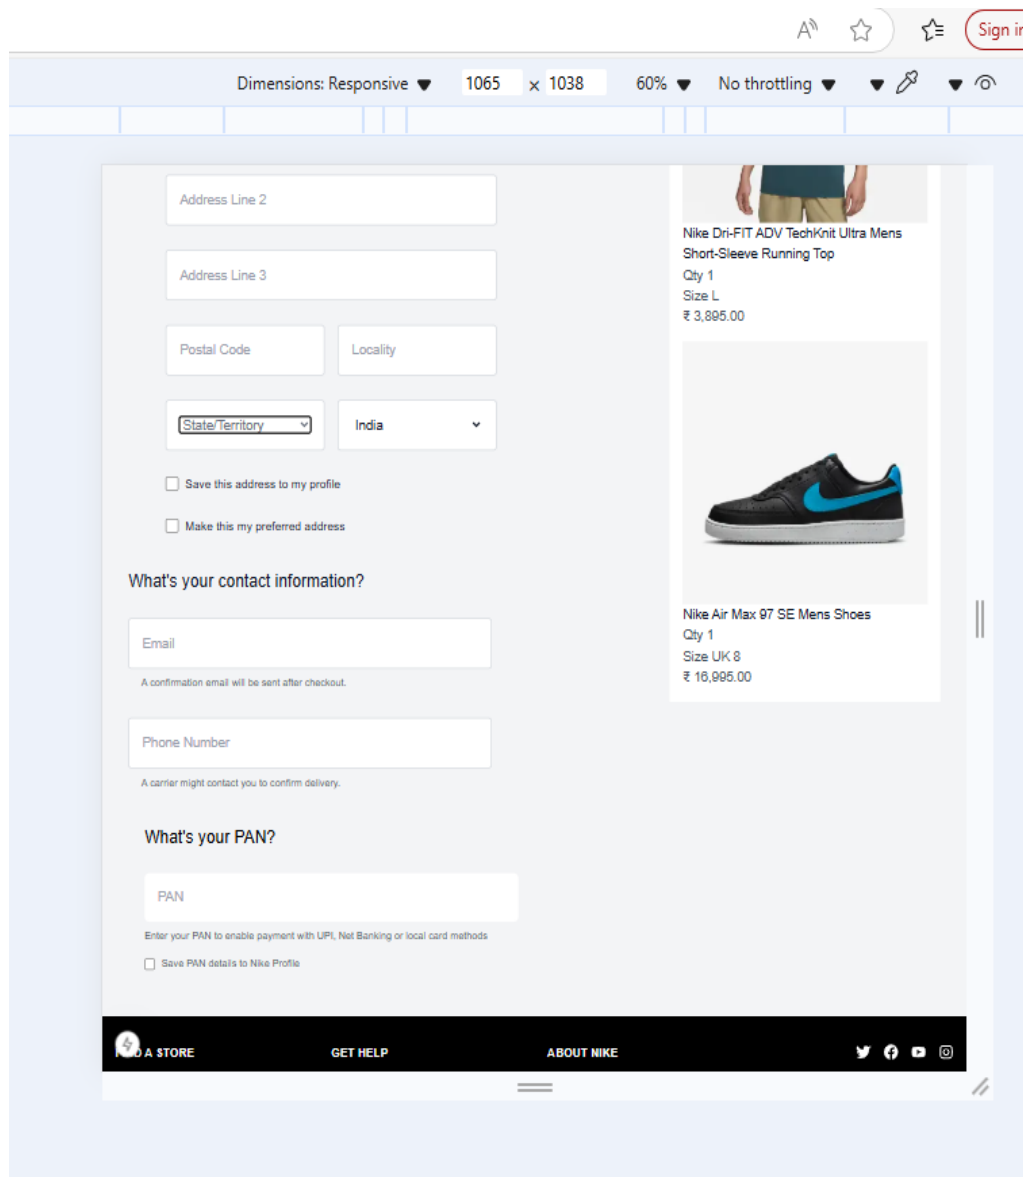

```
5 const OrderPage = () => {
13   /* Delivery Information */
14   <div className="mb-8">
15     <h2 className="text-lg font-medium mb-4" >text-gray-900</h2>
16     <p className="text-sm mb-4" >text-gray-600</p>
17     Customs regulation for India require a copy of the recipients KYC. The address on the KYC needs to match the shipping address.
18     <a href="#" className="text-blue-600">Learn More</a>
19   </div>
20   <div className="bg-white p-4 rounded border border-gray-300">
21     <input type="text" placeholder="Deliver it" className="w-full text-base" >text-gray-900 />
22   </div>
23
24   /* Name and Address Form */
25   <div className="p-5 max-w-md mx-auto">
26     <h2 className="text-xl font-medium mb-7" >text-gray-900</h2>
27     <form className="space-y-7">

Output Snippet:

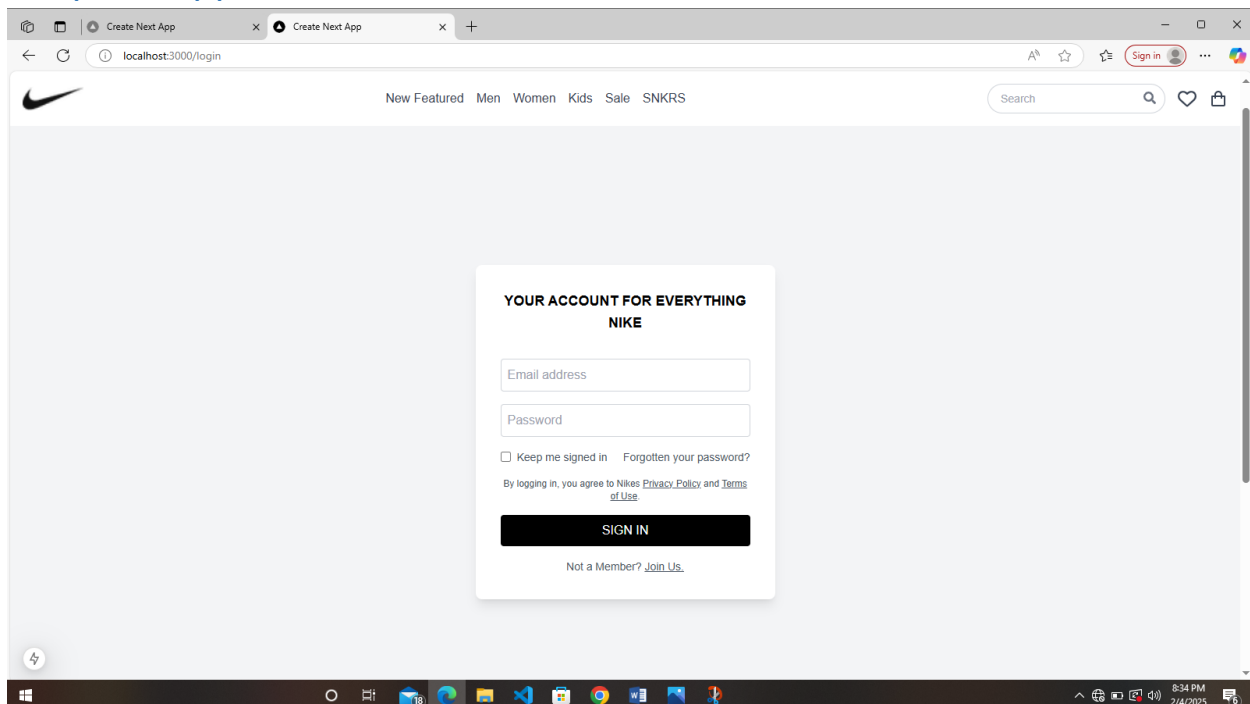

Login Component

Code Snippet:

```
3 import React, { useState } from 'react';
4
5 const Login = () => {
6   const [email, setEmail] = useState('');
7   const [password, setPassword] = useState('');
8   const [rememberMe, setRememberMe] = useState(false);
9
10  const handleSubmit = (e: React.FormEvent) => {
11    e.preventDefault();
12    console.log('Email:', email, 'Password:', password, 'Remember Me:', rememberMe);
13  };
14
15  return (
16    <div className="flex items-center justify-center min-h-screen bg-gray-100">
17      <div className="flex flex-col justify-center items-center bg-white p-8 w-full max-w-sm rounded-lg shadow-lg">
18        <h1 className="text-center font-bold text-lg text-black mb-8">
19          YOUR ACCOUNT FOR EVERYTHING NIKE
20        </h1>
21        <form className="w-full" onSubmit={handleSubmit}>
22          <div className="w-full mb-4">
23            <input
24              type="email"
25              placeholder="Email address"
26              value={email}
27              onChange={(e) => setEmail(e.target.value)}
28              className="w-full p-2 border border-gray-300 rounded"
29              required
30            />
31          </div>
32          <div className="w-full mb-4">
33            <input
34              type="password"
35              placeholder="Password"
36              value={password}
37            />
38          </div>
39          <div>
40            <input type="checkbox" /> Keep me signed in
41            <a href="#">Forgot your password?</a>
42          </div>
43          <p>By logging in, you agree to Nike's <a href="#">Privacy Policy</a> and <a href="#">Terms of Use</a>.</p>
44          <button type="submit" className="w-full bg-black text-white py-2 rounded">SIGN IN</button>
45          <p>Not a Member? <a href="#">Join Us.</a></p>
46        </form>
47      </div>
48    </div>
49  );
50}
```

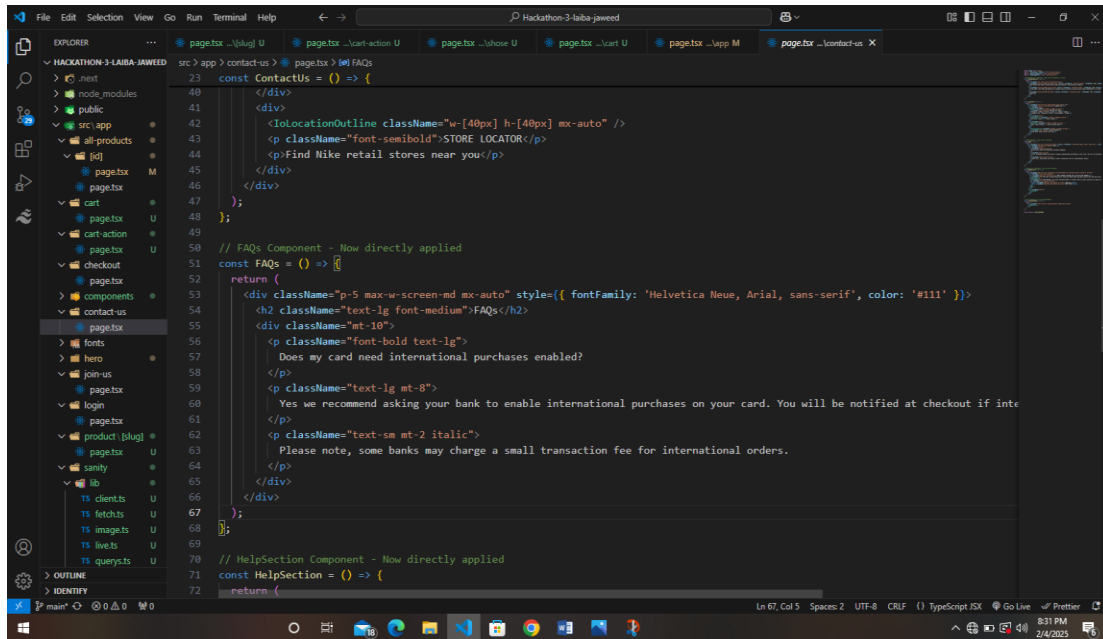

Output Snippet:

Laiba Jaweed

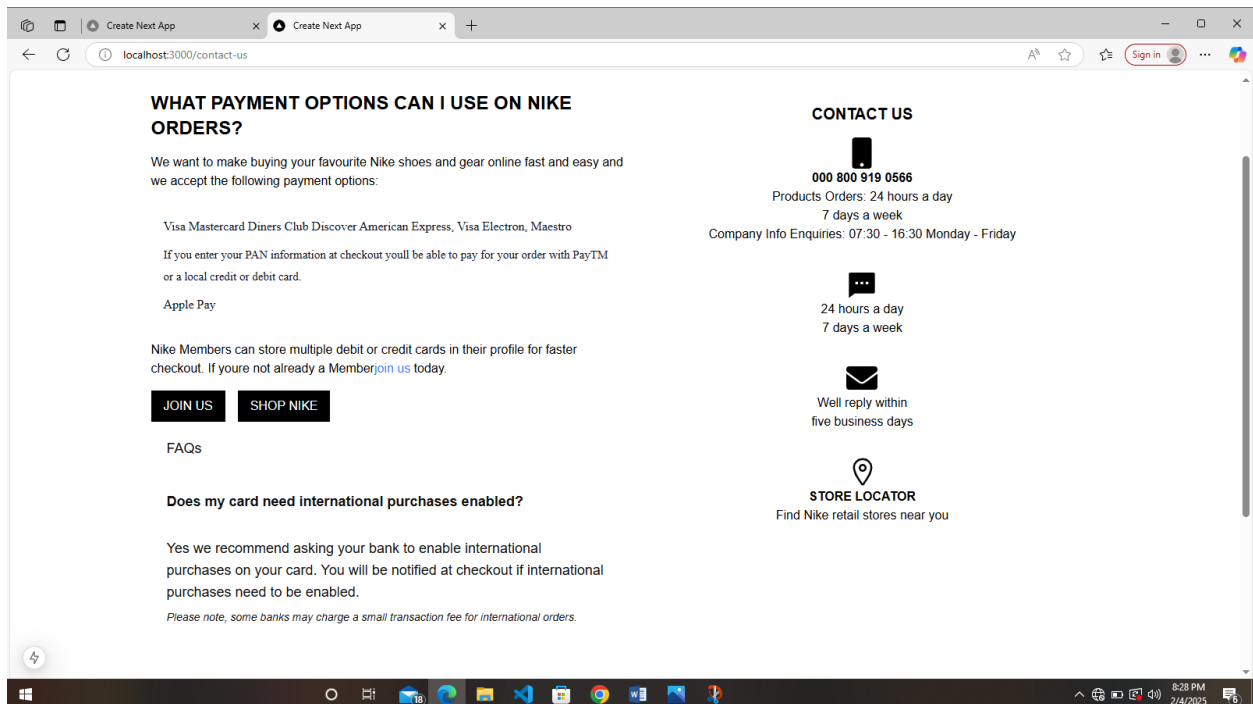

Contact and FAQs Component

Code Snippet:

```
23  const ContactUs = () => {
40    </div>
41    <div>
42      <LocationOutline className="w-[40px] h-[40px] mx-auto" />
43      <p className="font-semibold">STORE LOCATOR</p>
44      <p>Find Nike retail stores near you</p>
45    </div>
46  </div>
47  };
48  };
49  // FAQs Component - Now directly applied
50  const FAQs = () => {
51    return (
52      <div className="p-5 max-w-screen-md mx-auto" style={{ fontFamily: 'Helvetica Neue, Arial, sans-serif', color: '#111' }}>
53        <h2 className="text-lg font-medium">FAQs</h2>
54        <div className="mt-10">
55          <p className="font-bold text-lg">
56            Does my card need international purchases enabled?
57          </p>
58          <p className="text-lg mt-8">
59            Yes we recommend asking your bank to enable international purchases on your card. You will be notified at checkout if inte
60          </p>
61          <p className="text-sm mt-2 italic">
62            Please note, some banks may charge a small transaction fee for international orders.
63          </p>
64        </div>
65      </div>
66    );
67  };
68  // HelpSection Component - Now directly applied
69  const HelpSection = () => {
70    return (
71      <div>
72        <div>
```

Output Snippet:

API Integration:

1. **Sanity API Fetching Logic:** Since you're using Sanity CMS, you need to ensure data fetching is properly managed.
2. **Sanity Client Setup (if not already set up):** In your lib folder, configure the Sanity client.

Code Snippet:

```
.env.local  
1 NEXT_PUBLIC_SANITY_PROJECT_ID="[REDACTED]"  
2 NEXT_PUBLIC_SANITY_DATASET="production"  
3 SANITY_API_TOKEN=sk-[REDACTED]  
4  
5
```
